³ The Total Expense Ratio includes the fund's annual management charge plus any audit, custodian, registration or compliance fees paid out of the fund's assets. It does not include the costs of buying and selling securities, which would still be paid if investing directly in securities instead of through an investment fund.

MATRIX FUNDS

The funds that have been highlighted with a ■ against them are Matrix funds. Each Matrix Fund has a defined Management Risk Category and Equity Sector. The selection process for the external matrix funds involves input from an independent company – Morningstar Investment Management. There is also a governance process in place to ensure that the matrix funds continue to behave as you first expected. The governance process is run by the Investment Advisory Committee (IAC).

For further information on the Matrix funds please refer to our [Matrix Consumer Guide](#).

GOVERNED PORTFOLIOS

In addition to the individual funds we also have nine Governed Portfolios. Each portfolio has a different asset mix which are intended to be suitable for different risk categories and terms to retirement.

Each of the Governed Portfolios is populated with a range of funds managed by RLAM. However, there is also the option to replace the default equity fund – the Global Managed Fund – with an alternative equity fund or funds from a selection of fund managers available within our range.

The funds marked with a ▲ can be used to replace the default equity content of each of our Governed Portfolios and Governed Retirement Income Portfolios.
