

Workplace Pensions costs & charges

This document shows the costs and charges information for default investments relating to Royal London's personal pension and stakeholder pension schemes, that applied in 2020.

Default investment

The default investment is where your plan is invested if you don't make an individual investment choice. You don't have to follow the default and other investment options are available. You can find out where your plan is invested in your yearly statement or other plan documents, for example your plan certificate.

Selecting the right scheme

Royal London has 10 different workplace pension products and each of these products are written in one of 8 different pension schemes. The table on this page shows which scheme is relevant based on the workplace pension product you have. You will be able to find the name of your pension product on your yearly statement or other plan documents.

Click on the product name in the table below to go to the costs and charges information for that product.

Relevant pension scheme	Workplace pension product
Royal London Personal Pension Scheme (No2)	Retirement Solutions Group Personal Pension Plan
Royal London Personal Pension Scheme (No2)	Talisman Group Pension Plan
Royal London Personal Pension Scheme (No2)	Talisman Group Personal Pension Plan
Royal London Stakeholder Pension Scheme (No2)	Retirement Solutions Group Stakeholder Pension Plan
Royal London Stakeholder Pension Scheme (No3)	CIS Group Stakeholder Plan
Royal London ANL Personal Pension Scheme	PLAL Group Flexible Plan
Abbey Stakeholder Pension Scheme	PLAL Group Stakeholder Plan
Police Mutual Group Personal Pension	PMAS Group Personal Pension
The Royal Liver Assurance Stakeholder Pension Scheme	Royal Liver Group Stakeholder Plan
The Royal London Stakeholder Pension Scheme	Royal London Group Personal Pension

Additional information

The transaction costs that are relevant to you may depend on how close you are to your retirement age as this determines the investments that are held within your plan.

The administration charges shown are the default charges and apply to regular contributions, if applicable, and the plan value built up from previous regular contributions. The actual charges you pay could be higher or lower than the default charges depending on your plan value, the type and level of contributions, the investment choice and any payments being made to a financial adviser.

The costs and charges you pay for your investments are just one element to consider and you should review how the investments have performed too. You can find more information about how our investments have performed on our investment performance and fund price pages. There are links in the table below.

Workplace pension product(s)	Investment and fund information
Retirement Solutions and Talisman products	Investment performance page
CIS Group Stakeholder Plan	RL CIS Pension prices
PMAS Group Personal Pension	Principles and Practices of Financial Management
All other products	Royal London Plus unit prices

Want to know more?

For growth figures and charges that are personal to you please refer to your yearly statement.

If you want to know more about how our Independent Governance Committee (IGC) reviews the costs and charges and makes sure that our workplace pensions provide value for money you can read the latest IGC report in [the IGC hub](#).

The transaction costs shown in this document are specifically for the default investments. You can find out the transaction costs for other investments in our [transaction costs leaflet](#) for Retirement Solutions and Talisman products.

Retirement Solutions Group Personal Pension Plan

This page shows the costs and charges information for default investments relating to the **Retirement Solutions Group Personal Pension Plan**. The information is presented in ranges to show the minimum and maximum charges applying to employer schemes using each of the different default investments. We also show the average charge (mean) and the charge that is exactly in the middle (median). Not all default investments listed are available to all employer's schemes. The actual charges that are relevant to you will depend on your employer's scheme and whether you are invested in the default or have chosen different investments.

Percentage charges & projected retirement savings

The table below shows in percentage terms the range of administration charges and transaction costs for 2020 for all the default investment options used by employers with a Retirement Solutions Group Personal Pension Plan. The actual charges that are relevant to you will depend on your employer's scheme. These figures are based on a contribution of 8% of a £25,000 salary (£2,000 a year).

We've also provided some example projections below to show the impact these costs and charges could have over time on your retirement savings. The projections are shown in today's terms and do not need to be reduced further for the effect of future inflation and are based on:

- a starting retirement savings value of £5,000
- regular contributions of 8% of salary, based on a starting salary of £25,000
- a term of 40 years to chosen retirement date.

Additional information is provided on [page 15](#).

Additional information

1 These projections assume the following:

- Salary increases of 3.5% a year.
- Inflation of 2.0% a year.

The inflation and salary increase assumptions we've used are in line with those set out by the Financial Conduct Authority (FCA).

- 2 The figures shown are just examples and are not guaranteed. The administration charges are based on the default investments. The administration charges individual members pay could be different.
- 3 The transaction costs included in the calculations are based on historic information and the actual transaction costs in the future will be different to these.

- 4 You should not use this information as the sole reason to switch your investments within your pension plan. We would recommend you speak to a financial adviser if you are considering switching your investments.

Retirement Solutions Group Stakeholder Pension Plan

This page shows the costs and charges information for default investments relating to the **Retirement Solutions Group Stakeholder Pension Plan**. The information is presented in ranges to show the minimum and maximum charges applying to employer schemes using each of the different default investments. We also show the average charge (mean) and the charge that is exactly in the middle (median). Not all default investments listed are available to all employer's schemes. The actual charges that are relevant to you will depend on your employer's scheme and whether you are invested in the default or have chosen different investments.

Percentage charges & projected retirement savings

The table below shows in percentage terms the range of administration charges and transaction costs for 2020 for all the default investment options used by employers with a Retirement Solutions Group Stakeholder Pension Plan. The actual charges that are relevant to you will depend on your employer's scheme. These figures are based on a contribution of 8% of a £25,000 salary (£2,000 a year).

We've also provided some example projections below to show the impact these costs and charges could have over time on your retirement savings. The projections are shown in today's terms and do not need to be reduced further for the effect of future inflation and are based on:

- a starting retirement savings value of £5,000
- regular contributions of 8% of salary, based on a starting salary of £25,000
- a term of 40 years to chosen retirement date.

Additional information is provided on [page 18](#).

Additional information

1 These projections assume the following:

- Salary increases of 3.5% a year.
- Inflation of 2.0% a year.

The inflation and salary increase assumptions we've used are in line with those set out by the Financial Conduct Authority (FCA).

2 The figures shown are just examples and are not guaranteed. The administration charges are based on the default investments. The administration charges individual members pay could be different.

3 The transaction costs included in the calculations are based on historic information and the actual transaction costs in the future will be different to these.

4 You should not use this information as the sole reason to switch your investments within your pension plan. We would recommend you speak to a financial adviser if you are considering switching your investments.

Talisman Group Pension Plan

This page shows the costs and charges information for default investments relating to the **Talisman Group Pension Plan**. The information is presented in ranges to show the minimum and maximum charges applying to employer schemes using each of the different default investments. We also show the average charge (mean) and the charge that is exactly in the middle (median). The actual charges that are relevant to you will depend on your employer's scheme and whether you are invested in the default or have chosen different investments.

Percentage charges & projected retirement savings

The table below shows in percentage terms the range of administration charges and transaction costs for 2020 for all the default investment options used by employers with a Talisman Group Pension Plan. The actual charges that are relevant to you will depend on your employer's scheme.

We've also provided some example projections below to show the impact these costs and charges could have over time on your retirement savings.

The projections are shown in today's terms and do not need to be reduced further for the effect of future inflation and are based on:

- a starting retirement savings value of £10,000
- no regular contributions
- a term of 25 years to chosen retirement date.

Additional information is provided on [page 22](#).

Additional information

1 These projections assume the following:

- Inflation of 2.0% a year.

The inflation assumptions we've used are in line with those set out by the Financial Conduct Authority (FCA).

2 The figures shown are just examples and are not guaranteed. The administration charges are based on the default investments and don't make an allowance for any loyalty bonus that may apply at the chosen retirement date. The administration charges individual members pay could be different.

3 The transaction costs included in the calculations are based on

historic information and the actual transaction costs in the future will be different to these.

4 You should not use this information as the sole reason to switch your investments within your pension plan. We would recommend you speak to a financial adviser if you are considering switching your investments.

Talisman Group Personal Pension Plan

This page shows the costs and charges information for default investments relating to the **Talisman Group Personal Pension Plan**. The information is presented in ranges to show the minimum and maximum charges applying to employer schemes using each of the different default investments. We also show the average charge (mean) and the charge that is exactly in the middle (median). The actual charges that are relevant to you will depend on your employer's scheme and whether you are invested in the default or have chosen different investments.

Percentage charges & projected retirement savings

The table below shows in percentage terms the range of administration charges and transaction costs for 2020 for all the default investment options used by employers with a Talisman Group Personal Pension Plan. The actual charges that are relevant to you will depend on your employer's scheme.

We've also provided some example projections below to show the impact these costs and charges could have over time on your retirement savings.

The projections are shown in today's terms and do not need to be reduced further for the effect of future inflation and are based on:

- a starting retirement savings value of £20,000
- no regular contributions
- a term of 20 years to chosen retirement date.

Additional information is provided below.

Additional information

1 These projections assume the following:

- Inflation of 2.0% a year.

The inflation assumptions we've used are in line with those set out by the Financial Conduct Authority (FCA).

- 2 The figures shown are just examples and are not guaranteed. The administration charges are based on the default investments and don't make an allowance for any lump sum payments that may periodically be added to the members' plans. The administration charges individual members pay could be different.
- 3 The transaction costs included in the calculations are based on

historic information and the actual transaction costs in the future will be different to these.

- 4 You should not use this information as the sole reason to switch your investments within your pension plan. We would recommend you speak to a financial adviser if you are considering switching your investments.

CIS Group Stakeholder Plan

This page shows the costs and charges information for default investments relating to the **CIS Group Stakeholder Plan**. The information is presented in ranges to show the minimum and maximum charges applying to employer schemes using each of the different default investments. We also show the average charge (mean) and the charge that is exactly in the middle (median). The actual charges that are relevant to you will depend on your employer's scheme and whether you are invested in the default or have chosen different investments.

Percentage charges & projected retirement savings

The table below shows in percentage terms the range of administration charges and transaction costs for 2020 for all the default investment options used by employers with a CIS Group Stakeholder Plan. The actual charges that are relevant to you will depend on your employer's scheme.

We've also provided some example projections below to show the impact these costs and charges could have over time on your retirement savings.

The projections are shown in today's terms and do not need to be reduced further for the effect of future inflation and are based on:

- a starting retirement savings value of £10,000
- no regular contributions
- a term of 25 years to chosen retirement date.

1 These projections assume the following:

- Inflation of 2.0% a year.

The inflation assumptions we've used are in line with those set out by the Financial Conduct Authority (FCA).

2 The figures shown are just examples and are not guaranteed. The administration charges are based on the default investments. The administration charges individual members pay could be different.

3 The transaction costs included in the calculations are based on historic information and the actual transaction costs in the future will be different to these.

4 You should not use this information as the sole reason to switch your investments within your pension plan. We would recommend you speak to a financial adviser if you are considering switching your investments.
