

Your with profits ISA

Investment performance

In this leaflet we call your stocks and shares insurance ISA your with profits ISA. Your with profits ISA is invested in the RL open fund within the Royal London Long-Term Fund. In this leaflet we call this ‘the with profits fund’.

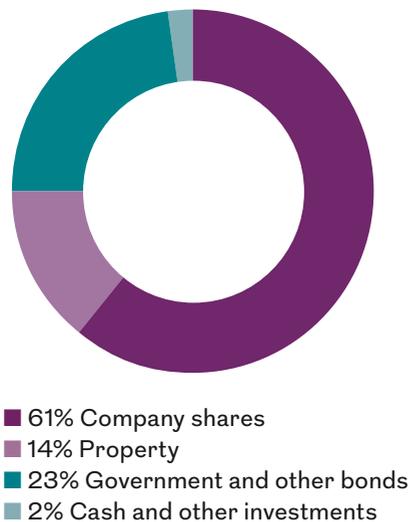

What is the investment mix of the with profits fund?

In managing the with profits fund, we aim to optimise the investment return for with profits policyholders whilst also protecting their guaranteed benefits within the with profits fund. We hold a wide range of assets to help reduce the risk that would arise if we invested in a single type of investment.

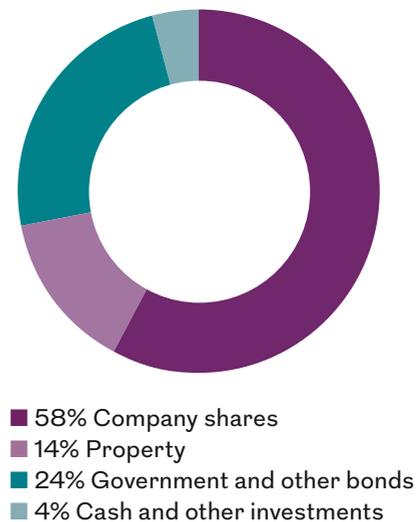

The charts below show the types of investments that asset shares have been invested in for the past two years. By asset share, we mean the build up of payments made into the with profits fund after taking off expenses, charges and tax and allowing for the profits and losses earned by the investments.

The investment returns from government bonds, other bonds and cash tend to vary less from year to year than the returns from company shares and property. However, over the longer term, the investment returns from government bonds, other bonds and cash tend to be lower than those from company shares and property.

Investment mix at 31.12.2025

Investment mix at 31.12.2024

What was the investment return for my with profits ISA for 2025?

The total investment return applied to asset shares in the with profits fund (before taxes and charges) for 2025 was 11.8%.

The with profit fund's investment portfolio has provided an overall positive return during 2025. The key source of growth was from company shares.

Due to the nature of your policy being with profits, we try to smooth out variations in investment returns year on year so that your policy is less affected by the ups and downs. Please refer to the next page to find out how your policy shares in these profits and losses.

We don't know what investment returns will be in the future; you shouldn't assume they'll be the same as they were in previous years. However, we believe that the investment mix is appropriate for the with profits fund in current economic conditions.

Investing responsibly

Driven by our Purpose, we look to act and invest responsibly. Visit royallondon.com/responsiblebusiness to find out more about our approach to

investing responsibly, as well as our climate commitments, and our stewardship and sustainability reporting.

How do I share in the profits and losses of the with profits fund?

The performance of the with profits fund is shared out to its policyholders through a system of bonuses. There are two types of bonus which we may add to your policy:

- regular bonuses, which we may add during the lifetime of your policy and which increase the unit price used to calculate the value of your policy, and
- final bonuses, which we may add when you cash in some or all of your policy. Final bonuses are not guaranteed and may go up or down.

We have increased the regular bonus rate for 2026 to 3.15%. Your bonus rate includes 0.15% added as a result of ProfitShare this year. You can read more about this in the section headed 'Royal London ProfitShare'.

In certain situations, for example bad stock market conditions or after a long period of low investment returns, the value of the with profits units allocated to your policy may be higher than the policy's asset share. If this happens, we may reduce the value of your units when you cash them in. This reduction in value is called a market value reduction (MVR). We will only apply an MVR to ensure fair payouts to everyone invested in the with profits fund. If we don't do this, investors staying in the with profits fund will not get their fair share.

There are some situations where we will not apply an MVR. Your policy document describes the situations that apply to your policy but these will normally include cashing units on death and we will not apply an MVR to with profits ISAs taken out before 6 April 2001.

There is more information on asset shares, how we decide regular and final bonus rates and MVRs in the leaflet 'A guide to how we manage our with profits fund.' We tell you how to get a copy at the end of this leaflet.

Royal London ProfitShare

As a result of our good operating profits and continued strong capital position we have allocated a discretionary ProfitShare to all eligible with profits policyholders. We have applied this by enhancing the asset share of your policy by 1.2%. As mentioned earlier, our approach to ProfitShare means that we have also given you an extra regular bonus of 0.15% this year.

We hope to award a similar level of ProfitShare next year and our business plan supports that. However, the current uncertainty in financial markets may affect the amount of profits we are able to earn and share with our customers. Rest assured that, whatever happens in 2026, we will do all we can to maintain your ProfitShare at an attractive level.

Where can I find out more information about the with profits fund?

You can view and download the following documents from our website royallondon.com:

- ‘Principles and Practices of Financial Management’ (PPFM) which is a technical document that explains the way in which we manage our with profits fund.
- ‘A guide to how we manage our with profits fund’ which is a plain English guide to the key points of the PPFM. This includes more information on asset shares and how we decide regular and final bonus rates and MVRs. The version that covers your policy is ‘Guide 3’.
- The Directors’ report on compliance which is the most recent report about how we’ve complied with the PPFM.

To find these documents please visit royallondon.com/PPFM. If you’d like braille, large print or audio versions of these documents, you can ask us to send you copies by calling us on 0345 050 2020.

Changes made to the PPFM

There have been a small number of updates made to the PPFM Practices to improve clarity.
