

GOVERNED RANGE MODERATELY CAUTIOUS LIFESTYLE STRATEGY (ANNUITY) FACTSHEET

What is a Lifestyle Strategy?

As you approach your retirement date, you'll probably want to reduce your investment risk. This Lifestyle Strategy is designed to help you do that. Your investments are gradually switched from higher to lower risk portfolios as you get closer to retirement.

The Lifestyle Strategy is not compulsory. You can start or stop it at any time, but it must apply to all contributions to your plan.

What governance process is in place?

Your Lifestyle Strategy comes with ongoing governance. This simply means that our investment experts check it regularly. It allows us to maintain the best mix of assets in line with the risk category - and to make sure it is performing in line with its overall objectives - aiming to give you the best returns. The value of your investment can go down as well as up and you may not get back the value of the original investment.

If our experts decide that the mix of assets needs to be adjusted, it happens automatically on your behalf, you don't need to do anything. What's more, this service comes at no extra cost.

For full details of our governance process please visit our website at royallondon.com/pensioninvestments.

Who is this strategy designed for?

It has been designed for investors with a moderately cautious attitude to risk. If you're not sure what your risk attitude is you can complete our online Risk Attitude Profiling Questionnaire at royallondon.com/pensioninvestments to give you an idea of your attitude to risk.

If you are in any doubt about the suitability of any particular type of investment, you should seek professional financial advice. Advisers may charge for providing such advice and should confirm any costs beforehand.

What is the investment objective?

This strategy aims to deliver above inflation growth in the value of the fund and income at retirement, assuming 25% is taken in cash and 75% is used to purchase an annuity. The strategy aims to invest with a level of risk consistent with a moderately cautious risk attitude.

Where is the strategy invested?

The strategy is invested in the Governed Portfolios shown. The mix of assets in each Governed Portfolio may change at any time in the future if our investment experts decide that a different blend of assets is more appropriate. It's an automatic process and there's no charge for it.

You will be automatically invested into the strategy at the point that matches your time to retirement.

As you approach retirement your money is automatically switched to ensure a gradual move between the portfolios and fund splits shown below. The switching occurs on a monthly basis on, or as close as possible to, the date on which your birthday falls.

Fund splits as at 10th May 2018 are shown in the following table:

Moderately Cautious Lifestyle Strategy (Annuity)	
Investment information 15 Years or more from retirement:

Details of changes to the strategy

The following table documents the last 3 changes that Royal London have made to the portfolios within this strategy.

Effective Date of Change	Overview of Changes
10/05/2018	<p>Governed Portfolio 4</p> <p>Our Investment Clock remains in its 'Overheat' phase, with increased risk of inflation, although the global economy is showing some signs of slowing. With investor sentiment staying neutral, we have taken further profits on the extra equities purchases made during the market lows; we also modestly reduced the overweight allocation to global high yield bonds. Proceeds of these sales were moved into real estate and a mix of government and corporate bonds. Longer term, we remain positive on stocks and are overweight global equities, global high yield bonds and commodities.</p>
10/05/2018	<p>Governed Portfolio 5 (Annuity)</p> <p>Our Investment Clock remains in its 'Overheat' phase, with increased risk of inflation, although the global economy is showing some signs of slowing. With investor sentiment staying neutral, we have taken further profits on the extra equities purchases made during the market lows and March; we also reduced the overweight allocation to commodities. Proceeds of these sales were moved into government bonds and cash. Longer term, we remain positive on stocks and are overweight global equities, global high yield bonds and commodities.</p>

Effective Date of Change	Overview of Changes
10/05/2018	<p>Governed Portfolio 3 (Annuity)</p> <p>Our Investment Clock remains in its 'Overheat' phase, with increased risk of inflation, although the global economy is showing some signs of slowing. With investor sentiment staying neutral, we have taken further profits on the extra equities purchases made during the market lows; we also reduced the overweight allocation to commodities. Proceeds of these sales were moved into government bonds and cash. Longer term, we remain positive on stocks and are overweight global equities, global high yield bonds and commodities.</p>
19/04/2018	<p>Governed Portfolio 4</p> <p>Our Investment Clock remains in the early stages of its 'Overheat' phase, with a robust worldwide economic expansion and increased risk of inflation. Following considerable volatility in markets in recent weeks, portfolio activity focused on risk management. We have increased the allocation to property, albeit the exposure remains an underweight; this was funded by reducing our overweight holding of equities. With economies continuing to expand and inflation remaining benign, we are overweight global equities, global high yield bonds and commodities.</p>

Effective Date of Change	Overview of Changes
19/04/2018	<p>Governed Portfolio 5 (Annuity) Our Investment Clock remains in the early stages of its 'Overheat' phase, with a robust worldwide economic expansion and increased risk of inflation. Following considerable volatility in markets in recent weeks, portfolio activity focused on risk management. We have again increased the allocation to 10-year index linked government bonds, bringing this underweight almost in line with the benchmark; this was funded by reducing our overweight holding of equities and from cash. With economies continuing to expand and inflation remaining benign, we are overweight global equities, global high yield bonds and commodities.</p>
19/04/2018	<p>Governed Portfolio 3 (Annuity) Our Investment Clock remains in the early stages of its 'Overheat' phase, with a robust worldwide economic expansion and increased risk of inflation. Following considerable volatility in markets in recent weeks, portfolio activity focused on risk management. We have again increased the allocation to 5-year conventional government bonds, albeit the exposure remains an underweight; this was funded by reducing our overweight holding of equities and from cash. With economies continuing to expand and inflation remaining benign, we are overweight global equities, global high yield bonds and commodities.</p>

Effective Date of Change	Overview of Changes
08/03/2018	<p>Governed Portfolio 4 Our Investment Clock is in the later cycle 'Overheat' stage, with strong global growth and more risk of inflation. We have added to equities again, capitalising on stock market weakness and given that supportive world growth conditions remain in place. The change was funded out of property and high yield debt. With economies continuing to expand and inflation remaining benign, we are overweight global equities, global high yield bonds and commodities.</p>
