

GOVERNED RANGE MODERATELY CAUTIOUS LIFESTYLE STRATEGY (ANNUITY) FACTSHEET

What is a Lifestyle Strategy?

As you approach your retirement date, you'll probably want to reduce your investment risk. This Lifestyle Strategy is designed to help you do that. Your investments are gradually switched from higher to lower risk portfolios as you get closer to retirement.

The Lifestyle Strategy is not compulsory. You can start or stop it at any time, but it must apply to all contributions to your plan.

What governance process is in place?

Your Lifestyle Strategy comes with ongoing governance. This simply means that our investment experts check it regularly. It allows us to maintain the best mix of assets in line with the risk category - and to make sure it is performing in line with its overall objectives - aiming to give you the best returns. The value of your investment can go down as well as up and you may not get back the value of the original investment.

If our experts decide that the mix of assets needs to be adjusted, it happens automatically on your behalf, you don't need to do anything. What's more, this service comes at no extra cost.

For full details of our governance process please visit our website at royallondon.com/pensioninvestments.

Who is this strategy designed for?

It has been designed for investors with a moderately cautious attitude to risk. If you're not sure what your risk attitude is you can complete our online Risk Attitude Profiling Questionnaire at royallondon.com/pensioninvestments to give you an idea of your attitude to risk.

If you are in any doubt about the suitability of any particular type of investment, you should seek professional financial advice. Advisers may charge for providing such advice and should confirm any costs beforehand.

What is the investment objective?

This strategy aims to deliver above inflation growth in the value of the fund and income at retirement, assuming 25% is taken in cash and 75% is used to purchase an annuity. The strategy aims to invest with a level of risk consistent with a moderately cautious risk attitude.

Where is the strategy invested?

The strategy is invested in the Governed Portfolios shown. The mix of assets in each Governed Portfolio may change at any time in the future if our investment experts decide that a different blend of assets is more appropriate. It's an automatic process and there's no charge for it.

You will be automatically invested into the strategy at the point that matches your time to retirement.

As you approach retirement your money is automatically switched to ensure a gradual move between the portfolios and fund splits shown below. The switching occurs on a monthly basis.

Fund splits as at 11th May 2023 are shown in the following table:

| Moderately Cautious Lifestyle Strategy (Annuity) | |
|--|--------|
| Investment information 15 Years or more from retirement: | |
| Governed Portfolio 4 | |

Details of changes to the strategy

The following table documents the last 3 changes that Royal London have made to the portfolios within this strategy.

| Effective Date of Change | Overview of Changes |
|--------------------------|--|
| 11/05/2023 | Governed Portfolio 4 We have been overweight equities, noting the improvement in macro conditions which has helped stock markets to record a positive start to the year. We maintain this overweight position in stocks but have deepened our commodity underweight position given signs of peaking inflation and waning energy demand. Elsewhere, we have decreased our exposure to government bonds at the margin. |
| 11/05/2023 | Governed Portfolio 5 (Annuity) We have been overweight equities, noting the improvement in macro conditions which has helped stock markets to record a positive start to the year. We maintain this overweight position in stocks but have deepened our commodity underweight position given signs of peaking inflation and waning energy demand. Elsewhere, we have decreased our exposure to government bonds at the margin. |
| 11/05/2023 | Governed Portfolio 3 (Annuity) We have been overweight equities, noting the improvement in macro conditions which has helped stock markets to record a positive start to the year. We maintain this overweight position in stocks but have deepened our commodity underweight position given signs of peaking inflation and waning energy demand. Elsewhere, we have decreased our exposure to government bonds at the margin. |

| Effective Date of Change | Overview of Changes |
|--------------------------|--|
| 20/04/2023 | Governed Portfolio 4 We are overweight equities against the new strategic asset allocation. Global growth continues to show tentative signs of stabilisation and we see continued upside risk in equity markets as banking sector turmoil has subsided for now. However, we are ready to become more defensive if we start to see evidence of tighter financial conditions impacting the economy or if inflation remains elevated and forces further central banks tightening. We remain underweight commodities. |
| 20/04/2023 | Governed Portfolio 5 (Annuity) We are overweight equities against the new strategic asset allocation. Global growth continues to show tentative signs of stabilisation and we see continued upside risk in equity markets as banking sector turmoil has subsided for now. However, we are ready to become more defensive if we start to see evidence of tighter financial conditions impacting the economy or if inflation remains elevated and forces further central banks tightening. We remain underweight commodities. |
| 20/04/2023 | Governed Portfolio 3 (Annuity) We are overweight equities against the new strategic asset allocation. Global growth continues to show tentative signs of stabilisation and we see continued upside risk in equity markets as banking sector turmoil has subsided for now. However, we are ready to become more defensive if we start to see evidence of tighter financial conditions impacting the economy or if inflation remains elevated and forces further central banks tightening. We remain underweight commodities and have reduced our underweight in property. |

| Effective Date of Change | Overview of Changes |
|--------------------------|--|
| 23/03/2023 | Governed Portfolio 4 We have been overweight equities but have reduced risk in the portfolios as uncertainty rises around the banking sector, reducing exposure to equities and deepening our commodity underweight position given rising recession risks. We are monitoring the situation closely, ready either to get more defensive or buy the dip as the economic impact of recent events becomes clearer. We have increased our overall exposure to bonds, adding to credit and government bonds. |
| 23/03/2023 | Governed Portfolio 5 (Annuity) We have been overweight equities but have reduced risk in the portfolios as uncertainty rises around the banking sector, reducing exposure to equities and deepening our commodity underweight position given rising recession risks. We are monitoring the situation closely, ready either to get more defensive or buy the dip as the economic impact of recent events becomes clearer. We have increased our overall exposure to bonds, adding to credit and government bonds. |
