

# GOVERNED RANGE MODERATELY ADVENTUROUS TRACKER LIFESTYLE STRATEGY (ANNUITY) FACTSHEET

### What is a Lifestyle Strategy?

As you approach your retirement date, you'll probably want to reduce your investment risk. This Lifestyle Strategy is designed to help you do that. Your investments are gradually switched from higher to lower risk portfolios as you get closer to retirement.

The Lifestyle Strategy is not compulsory. You can start or stop it at any time, but it must apply to all contributions to your plan.

#### What governance process is in place?

Your Lifestyle Strategy comes with ongoing governance. This simply means that our investment experts check it regularly. It allows us to maintain the best mix of assets in line with the risk category and to make sure it is performing in line with its overall objectives - aiming to give you the best returns. The value of your investment can go down as well as up and you may not get back the value of the original investment.

If our experts decide that the mix of assets needs to be adjusted, it happens automatically on your behalf, you don't need to do anything. What's more, this service comes at no extra cost.

For full details of our governance process please visit our website at

royallondon.com/pensioninvestments.

### Who is this strategy designed for?

It has been designed for investors with a moderately adventurous attitude to risk. If you're not sure what your risk attitude is you can complete our online Risk Attitude Profiling Questionnaire at **royallondon.com/pensioninvestments** to give you an idea of your attitude to risk.

If you are in any doubt about the suitability of any particular type of investment, you should seek professional financial advice. Advisers may charge for providing such advice and should confirm any costs beforehand.

#### What is the investment objective?

This strategy aims to deliver above inflation growth in the value of the fund and income at retirement, assuming 25% is taken in cash and 75% is used to purchase an annuity. The strategy aims to invest with a level of risk consistent with a moderately adventurous risk attitude.

#### Where is the strategy invested?

The strategy is invested in the Governed Portfolios shown. The mix of assets in each Governed Portfolio may change at any time in the future if our investment experts decide that a different blend of assets is more appropriate. It's an automatic process and there's no charge for it.

You will be automatically invested into the strategy at the point that matches your time to retirement.

As you approach retirement your money is automatically switched to ensure a gradual move between the portfolios and fund splits shown below. The switching occurs on a monthly basis.

Fund splits as at 18th September 2025 are shown in the following table:

18/09/2025	Governed Portfolio Growth Global equities have continued their strong summer rally and now sit at fresh all-time highs. Growth stocks in particular have surged on Fed rate cut expectations, and AI optimism. We are adding at the margin to stocks, with corporate earnings and improving economic conditions both supportive for the asset class. Elsewhere, we are maintaining our current positioning in bonds and commodities.

Change	
04/09/2025	Governed Portfolio Growth Global stock markets have continued their strong post-Liberation Day performance over recent weeks, as positive economic surprises have helped propel markets to fresh highs. We are marginally reducing our overweight position in equities, taking profits at these levels, as we head into a potentially more volatile period. Elsewhere, we are moving further underweight bonds as concerns around fiscal sustainability and Fed independence have continued to weigh on the asset class, particularly at the long end of the curve.

07/08/2025	Governed Portfolio Growth Stock markets have extended their rally over recent weeks, marking a third consecutive month of gains. Despite an uncertain macro backdrop and persistently elevated policy uncertainty, this strength in stocks has been underpinned by a strong start to corporate earnings season, alongside a series of positive economic data surprises. We are adding to equities at the margin, increasing our overweight position. Elsewhere, we remain neutral on commodities, and retain our modest underweight position in bonds.
