

## **GOVERNED RANGE CAUTIOUS ACTIVE LIFESTYLE STRATEGY (ANNUITY) FACTSHEET**

### **What is a Lifestyle Strategy?**

As you approach your retirement date, you'll probably want to reduce your investment risk. This Lifestyle Strategy is designed to help you do that. Your investments are gradually switched from higher to lower risk portfolios as you get closer to retirement.

The Lifestyle Strategy is not compulsory. You can start or stop it at any time, but it must apply to all contributions to your plan.

### **What governance process is in place?**

Your Lifestyle Strategy comes with ongoing governance. This simply means that our investment experts check it regularly. It allows us to maintain the best mix of assets in line with the risk category - and to make sure it is performing in line with its overall objectives - aiming to give you the best returns. The value of your investment can go down as well as up and you may not get back the value of the original investment.

If our experts decide that the mix of assets needs to be adjusted, it happens automatically on your behalf, you don't need to do anything. What's more, this service comes at no extra cost.

For full details of our governance process please visit our website at [royallondon.com/pensioninvestments](http://royallondon.com/pensioninvestments).

### **Who is this strategy designed for?**

It has been designed for investors with a cautious attitude to risk. If you're not sure what your risk attitude is you can complete our online Risk Attitude Profiling Questionnaire at [royallondon.com/pensioninvestments](http://royallondon.com/pensioninvestments) to give you an idea of your attitude to risk.

If you are in any doubt about the suitability of any particular type of investment, you should seek professional financial advice. Advisers may charge for providing such advice and should confirm any costs beforehand.

### **What is the investment objective?**

This strategy aims to deliver above inflation growth in the value of the fund and income at retirement, assuming 25% is taken in cash and 75% is used to purchase an annuity. The strategy aims to invest with a level of risk consistent with a cautious risk attitude.

### **Where is the strategy invested?**

The strategy is invested in the Governed Portfolios shown. The mix of assets in each Governed Portfolio may change at any time in the future if our investment experts decide that a different blend of assets is more appropriate. It's an automatic process and there's no charge for it.

Please note that RLP/Global Blend Core Plus (Rathbone Global Alpha) has an additional charge.

You will be automatically invested into the strategy at the point that matches your time to retirement.

As you approach retirement your money is automatically switched to ensure a gradual move between the portfolios and fund splits shown below. The switching occurs on a monthly basis on, or as close as possible to, the date on which your birthday falls.

Fund splits as at 8th February 2018 are shown in the following table:

<b>Cautious Active Lifestyle Strategy (Annuity)</b>	
Investment information 15 Years or more from retirement:	
<b>Governed Portfolio 1</b>

### Details of changes to the strategy

The following table documents the last 3 changes that Royal London have made to the portfolios within this strategy.

Effective Date of Change	Overview of Changes
08/02/2018	<p><b>Governed Portfolio 1</b></p> <p>As our Investment Clock moves further into 'Overheat' territory, we have added to equities at the margin and also added to commodities again, funded out of bonds. While the supply-demand balance is favourable for commodities, potential for weaker demand in China, the world's biggest consumer of raw materials, is a concern. The sell-off in equities that began at the end of January seems exaggerated, and we are buying at lower levels, in expectation of a recovery in coming months as the world economy keeps expanding. We will look to maintain an overweight allocation to stocks.</p>
08/02/2018	<p><b>Governed Portfolio 2 (Annuity)</b></p> <p>As our Investment Clock moves further into 'Overheat' territory, we have added to equities at the margin and also added to commodities again, funded out of bonds. While the supply-demand balance is favourable for commodities, potential for weaker demand in China, the world's biggest consumer of raw materials, is a concern. We will look to maintain an overweight allocation to stocks.</p>
18/01/2018	<p><b>Governed Portfolio 1</b></p> <p>A combination of our 'Investment Clock' moving further into 'Overheat' and positive price momentum mean that we have added to commodities at the margin, funded out of bonds. Nevertheless, we remain cautious on commodities as the Chinese economy is likely to slow, and recent US dollar weakness could reverse, in line with interest rate differentials. We slightly increased the position in high yield bonds. We will look to maintain our overweight position in stocks; with investor sentiment so positive, we do not rule out a short-term set-back and we would use such an opportunity to increase our equity allocation.</p>

<b>Effective Date of Change</b>	<b>Overview of Changes</b>
16/11/2017	<p><b>Governed Portfolio 1</b>  There are signs that growth is picking up, against a backdrop of loose monetary policy and low inflation. Against such a backdrop, central banks are unlikely to tighten in a meaningful way; this is positive for stocks and high yield, where we remain overweight. With seasonality now positive, we are likely to buy dips in stock markets rather than sell rallies. We've marginally increased our underweight in bonds and taken some profits in high yield. We have added to commodities at the margin.</p>
