

## **GOVERNED RANGE MODERATELY CAUTIOUS ACTIVE LIFESTYLE STRATEGY (ANNUITY) FACTSHEET**

### **What is a Lifestyle Strategy?**

As you approach your retirement date, you'll probably want to reduce your investment risk. This Lifestyle Strategy is designed to help you do that. Your investments are gradually switched from higher to lower risk portfolios as you get closer to retirement.

The Lifestyle Strategy is not compulsory. You can start or stop it at any time, but it must apply to all contributions to your plan.

### **What governance process is in place?**

Your Lifestyle Strategy comes with ongoing governance. This simply means that our investment experts check it regularly. It allows us to maintain the best mix of assets in line with the risk category - and to make sure it is performing in line with its overall objectives - aiming to give you the best returns. The value of your investment can go down as well as up and you may not get back the value of the original investment.

If our experts decide that the mix of assets needs to be adjusted, it happens automatically on your behalf, you don't need to do anything. What's more, this service comes at no extra cost.

For full details of our governance process please visit our website at [royallondon.com/pensioninvestments](https://royallondon.com/pensioninvestments).

### **Who is this strategy designed for?**

It has been designed for investors with a moderately cautious attitude to risk. If you're not sure what your risk attitude is you can complete our online Risk Attitude Profiling Questionnaire at [royallondon.com/pensioninvestments](https://royallondon.com/pensioninvestments) to give you an idea of your attitude to risk.

If you are in any doubt about the suitability of any particular type of investment, you should seek professional financial advice. Advisers may charge for providing such advice and should confirm any costs beforehand.

### **What is the investment objective?**

This strategy aims to deliver above inflation growth in the value of the fund and income at retirement, assuming 25% is taken in cash and 75% is used to purchase an annuity. The strategy aims to invest with a level of risk consistent with a moderately cautious risk attitude.

### **Where is the strategy invested?**

The strategy is invested in the Governed Portfolios shown. The mix of assets in each Governed Portfolio may change at any time in the future if our investment experts decide that a different blend of assets is more appropriate. It's an automatic process and there's no charge for it.

Please note that RLP/Global Blend Core Plus (Rathbone Global Alpha) has an additional charge.

You will be automatically invested into the strategy at the point that matches your time to retirement.

As you approach retirement your money is automatically switched to ensure a gradual move between the portfolios and fund splits shown below. The switching occurs on a monthly basis on, or as close as possible to, the date on which your birthday falls.

Fund splits as at 18th October 2018 are shown in the following table:

<b>Moderately Cautious Active Lifestyle Strategy (Annuity)</b>	
Investment information 15 Years or more from retirement:	
<b>Governed Portfolio 4</b>

## Details of changes to the strategy

The following table documents the last 3 changes that Royal London have made to the portfolios within this strategy.

Effective Date of Change	Overview of Changes
18/10/2018	<p><b>Governed Portfolio 4</b></p> <p>A selloff in global equity markets has pushed our investor sentiment indicator deep into panic territory; in response, we began contrarian purchases of stocks, as our models are constructive on world growth and risks related to inflation and interest rates do not seem strong. We also increased commodities exposure following recent underperformance, while remaining below benchmark. These purchases were funded from government bonds and cash. With US fiscal policy loose, interest rates low elsewhere in developed markets and China easing policy, we expect the global economic expansion to continue into 2019 and this to be supportive for equities.</p>
18/10/2018	<p><b>Governed Portfolio 5 (Annuity)</b></p> <p>A selloff in global equity markets has pushed our investor sentiment indicator deep into panic territory; in response, we began contrarian purchases of stocks, as our models are constructive on world growth and risks related to inflation and interest rates do not seem strong. We also increased commodities exposure following recent underperformance, while remaining below benchmark. These purchases were funded from government bonds and cash. Effective Date of Change	Overview of Changes
18/10/2018	<p><b>Governed Portfolio 3 (Annuity)</b></p> <p>A selloff in global equity markets has pushed our investor sentiment indicator deep into panic territory; in response, we began contrarian purchases of stocks, as our models are constructive on world growth and risks related to inflation and interest rates do not seem strong. We also increased commodities exposure following recent underperformance, while remaining below benchmark. These purchases were funded from government bonds and cash. With US fiscal policy loose, interest rates low elsewhere in developed markets and China easing policy, we expect the global economic expansion to continue into 2019 and this to be supportive for equities.</p>
20/09/2018	<p><b>Governed Portfolio 4</b></p> <p>With inflation continuing to rise and global growth cooling, we continue to de-risk our portfolios by reducing exposures to stocks and commodities, moving the latter allocation to an underweight relative to the benchmark. The proceeds were moved into government bonds, short dated high yield debt and cash. With no central banks in a hurry to tighten policy, we'd probably buy stocks on weakness, as we expect the business expansion to continue in 2019.</p>
20/09/2018	<p><b>Governed Portfolio 5 (Annuity)</b></p> <p>With inflation continuing to rise and global growth cooling, we continue to de-risk our portfolios by reducing exposures to stocks and commodities, moving the latter allocation to an underweight relative to the benchmark. The proceeds were moved into government bonds, short dated high yield debt and cash. With no central banks in a hurry to tighten policy, we'd probably buy stocks on weakness, as we expect the business expansion to continue in 2019.</p>

Effective Date of Change	Overview of Changes
20/09/2018	<b>Governed Portfolio 3 (Annuity)</b> With inflation continuing to rise and global growth cooling, we continue to de-risk our portfolios by reducing exposures to stocks and commodities, moving the latter allocation to an underweight relative to the benchmark. The proceeds were moved into government bonds, short dated high yield debt and cash. With no central banks in a hurry to tighten policy, we'd probably buy stocks on weakness, as we expect the business expansion to continue in 2019.
16/08/2018	<b>Governed Portfolio 4</b> A currency crisis in Turkey has rattled global stock markets. Before the selloff, our multi asset funds were already positioned relatively defensively, with the smallest overweight in equities since 2012 and favouring the US over emerging markets. We continued to reduce exposures to stocks and commodities, bringing the latter allocation into line with the benchmark. The proceeds were moved into government bonds, both conventional and index linked, and cash. We will look to add back to stocks in coming months. We are modestly overweight global equities and short dated global high yield bonds.

Effective Date of Change	Overview of Changes
16/08/2018	<b>Governed Portfolio 5 (Annuity)</b> A currency crisis in Turkey has rattled global stock markets. Before the selloff, our multi asset funds were already positioned relatively defensively, with the smallest overweight in equities since 2012 and favouring the US over emerging markets. We continued to reduce exposures to stocks and commodities, bringing the latter allocation into line with the benchmark. The proceeds were moved into government bonds and short dated high yield debt. 16/08/2018	<b>Governed Portfolio 3 (Annuity)</b> A currency crisis in Turkey has rattled global stock markets. Before the selloff, our multi asset funds were already positioned relatively defensively, with the smallest overweight in equities since 2012 and favouring the US over emerging markets. We continued to reduce exposures to stocks and commodities, bringing the latter allocation into line with the benchmark, and lowered the cash holding. The proceeds were moved into government bonds and short dated high yield debt. We will look to add back to stocks in coming months. We are modestly overweight global equities and short dated global high yield bonds.
08/10/2015	<b>Annuity Retirement</b> We have replaced the allocation of 75% RLP Medium Index Linked and 25% RLP Deposit with a 100% allocation to RLP Annuity. This fund provides greater diversification and is designed to produce better outcomes for customers.
