

GOVERNED RANGE BALANCED TRACKER LIFESTYLE STRATEGY (DRAWDOWN) FACTSHEET

What is a Lifestyle Strategy?

As you approach your retirement date, you'll probably want to reduce your investment risk. This Lifestyle Strategy is designed to help you do that. Your investments are gradually switched from higher to lower risk portfolios as you get closer to retirement.

The Lifestyle Strategy is not compulsory. You can start or stop it at any time, but it must apply to all contributions to your plan.

What governance process is in place?

Your Lifestyle Strategy comes with ongoing governance. This simply means that our investment experts check it regularly. It allows us to maintain the best mix of assets in line with the risk category - and to make sure it is performing in line with its overall objectives - aiming to give you the best returns. The value of your investment can go down as well as up and you may not get back the value of the original investment.

If our experts decide that the mix of assets needs to be adjusted, it happens automatically on your behalf, you don't need to do anything. What's more, this service comes at no extra cost.

For full details of our governance process please visit our website at royallondon.com/pensioninvestments.

Who is this strategy designed for?

It has been designed for investors who want to use their fund to support a flexible income at retirement (known as drawdown) and have a balanced attitude to risk. If you're not sure what your risk attitude is you can complete our online Risk Attitude Profiling Questionnaire at royallondon.com/pensioninvestments to give you an idea of your attitude to risk.

If you are in any doubt about the suitability of any particular type of investment, you should seek professional financial advice. Advisers may charge for providing such advice and should confirm any costs beforehand.

What is the investment objective?

This strategy aims to deliver above inflation growth in the value of the fund at retirement. It has been designed to support regular income withdrawals when you retire, whilst taking a level of risk consistent with a balanced risk attitude.

Where is the strategy invested?

The strategy is invested in the portfolios shown. The mix of assets in each portfolio may change at any time in the future if our investment experts decide that a different blend of assets is more appropriate. It's an automatic process and there's no charge for it.

You will be automatically invested into the strategy at the point that matches your time to retirement.

As you approach retirement your money is automatically switched to ensure a gradual move between the portfolios and fund splits shown below. The switching occurs on a monthly basis.

Fund splits as at 25th July 2024 are shown in the following table:

Balanced Tracker Lifestyle Strategy (Drawdown)

Details of changes to the strategy

The following table documents the last 3 changes that Royal London have made to the portfolios within this strategy.

Effective Date of Change	Overview of Changes
25/07/2024	<p>Governed Portfolio 4</p> <p>We have reduced the size of our overweight position in global equities, moving closer to neutral with our measure of investor sentiment beginning to look overly bullish despite some concerns emerging from the recent corporate earnings season. With global stocks near all time highs and political risk still high we have taken some profits. We have also reduced our exposure to commodities, moving further underweight the asset class which continues to slide on weaker Chinese demand outlook. We have added to government bonds and cash which should outperform as summer volatility begins to rise.</p>
25/07/2024	<p>Governed Portfolio 5 (Drawdown)</p> <p>We have reduced the size of our overweight position in global equities, moving closer to neutral with our measure of investor sentiment beginning to look overly bullish despite some concerns emerging from the recent corporate earnings season. With global stocks near all time highs and political risk still high we have taken some profits. We have also reduced our exposure to commodities, moving further underweight the asset class which continues to slide on weaker Chinese demand outlook. We have added to government bonds and cash which should outperform as summer volatility begins to rise.</p>

Effective Date of Change	Overview of Changes
11/07/2024	<p>Governed Portfolio 4 Global equities have rallied to fresh highs over recent weeks, with growth stocks continuing to lead markets higher. We have benefitted from an overweight position which we continue to hold as earnings trends continue to show strength heading into reporting season. Elsewhere, we maintain a neutral allocation to commodities as weaker demand trends continue to weight on the asset class, even despite tighter supply. Elsewhere we have increased the size of our underweight position to government bonds.</p>
11/07/2024	<p>Governed Portfolio 5 (Drawdown) Global equities have rallied to fresh highs over recent weeks, with growth stocks continuing to lead markets higher. We have benefitted from an overweight position which we continue to hold as earnings trends continue to show strength heading into reporting season. Elsewhere, we maintain a neutral allocation to commodities as weaker demand trends continue to weight on the asset class, even despite tighter supply. Effective Date of Change	Overview of Changes
11/07/2024	<p>Governed Retirement Income Portfolio 3 Global equities have rallied to fresh highs over recent weeks, with growth stocks continuing to lead markets higher. We have benefitted from an overweight position which we continue to hold as earnings trends continue to show strength heading into reporting season. Elsewhere, we maintain a neutral allocation to commodities as weaker demand trends continue to weight on the asset class, even despite tighter supply. Elsewhere we have increased the size of our underweight position to government bonds.</p>
20/06/2024	<p>Governed Portfolio 4 Global equities have continued to rebound over recent weeks, moving to fresh highs despite increased political risk in Europe. We have increased our allocation to stocks, moving further overweight as positive earnings continue to drive markets higher. Elsewhere, we maintain a neutral allocation to commodities; supply remains tight however signs of waning demand are a headwind against the asset class. We also maintain an underweight position to government bonds.</p>
