

GOVERNED RANGE ADVENTUROUS TRACKER LIFESTYLE STRATEGY (ANNUITY) (ISA) FACTSHEET

What is a Lifestyle Strategy?

As you approach your target date, you'll probably want to reduce your investment risk. This Lifestyle Strategy is designed to help you do that. Your investments are gradually switched from higher to lower risk portfolios as you get closer to target.

The Lifestyle Strategy is not compulsory. You can start or stop it at any time, but it must apply to all contributions to your plan.

What governance process is in place?

Your Lifestyle Strategy comes with ongoing governance. This simply means that our investment experts check it regularly. It allows us to maintain the best mix of assets in line with the risk category - and to make sure it is performing in line with its overall objectives - aiming to give you the best returns. The value of your investment can go down as well as up and you may not get back the value of the original investment.

If our experts decide that the mix of assets needs to be adjusted, it happens automatically on your behalf, you don't need to do anything. What's more, this service comes at no extra cost.

For full details of our governance process please visit our website at **royallondon.com/pensioninvestments**.

Who is this strategy designed for?

It has been designed for investors with an adventurous attitude to risk. If you're not sure what your risk attitude is you can complete our online Risk Attitude Profiling Questionnaire at **royallondon.com/pensioninvestments** to give you an idea of your attitude to risk.

If you are in any doubt about the suitability of any particular type of investment, you should seek professional financial advice. Advisers may charge for providing such advice and should confirm any costs beforehand.

What is the investment objective?

This strategy aims to deliver above inflation growth in the value of the fund and income at your target date, assuming 25% is taken in cash and 75% is used to purchase an annuity. The strategy aims to invest with a level of risk consistent with an adventurous risk attitude.

Where is the strategy invested?

The strategy is invested in the Governed Portfolios shown. The mix of assets in each Governed Portfolio may change at any time in the future if our investment experts decide that a different blend of assets is more appropriate. It's an automatic process and there's no charge for it.

You will be automatically invested into the strategy at the point that matches your time to your target date.

As you approach your target date your money is automatically switched to ensure a gradual move between the portfolios and fund splits shown below. The switching occurs on a monthly basis.

Fund splits as at 5th February 2026 are shown in the following table:

| Adventurous Tracker Lifestyle Strategy (Annuity) (ISA) | |
|---|---------|
| Investment information 15 Years or more from retirement: | |
| Governed Portfolio Total Equity (ISA) | |

Details of changes to the strategy

The following table documents the last 3 changes that Royal London have made to the portfolios within this strategy.

| Effective Date of Change | Overview of Changes |
|--------------------------|--|
| 05/02/2026 | Governed Portfolio Enhanced (ISA) We maintain a moderate overweight position in global equities. Despite some softness in markets over recent weeks, earnings growth continues to broaden in this corporate earning season and provide support the asset class. Elsewhere we have reduced our exposure to government bonds and added further to our overweight position in commodities. Commodity prices have risen sharply to start the year and we continue to see upside in the asset class, with geopolitical risk at high levels. |

continued on next page...

| Effective Date of Change | Overview of Changes |
|--------------------------|--|
| 22/01/2026 | Governed Portfolio Enhanced (ISA) Global equity markets have been volatile over recent weeks, with investors concerned about the actions of President Trump and the escalating Greenland situation. US policy uncertainty continues to increase, with concerns around Fed independence and the Supreme Court ruling on tariffs still in the balance. US equities have underperformed global peers so far this year, whilst Japanese stocks have outperformed. We are marginally reducing our equity exposure given this heightened geopolitical risk but remain overweight given the current global macro environment. Elsewhere, we are overweight commodities, and neutral on bonds, as we continue to monitor geopolitical and fiscal developments. |

| Effective Date of Change | Overview of Changes |
|--------------------------|--|
| 08/01/2026 | Governed Portfolio Enhanced (ISA) Equity markets had a strong end to 2025, marking a third consecutive year of double-digit returns. Despite increasing focus on Artificial Intelligence, US stocks underperformed the rest of the world in 2025. EM and Asia Pacific shares were the top performers, benefitting mainly from USD weakness, cheap starting valuations and a strong rally in Asian tech. As we enter 2026, we remain overweight equities as the short-to-medium term economic outlook remains supportive, with broadening economic growth and looser fiscal policy. Elsewhere, we are overweight commodities, and neutral on bonds, as we continue to monitor geopolitical and fiscal developments. |
| 08/10/2015 | Annuity Retirement We have replaced the allocation of 75% RLP Medium Index Linked and 25% RLP Deposit with a 100% allocation to RLP Annuity. This fund provides greater diversification and is designed to produce better outcomes for customers. |
