

GOVERNED RANGE CAUTIOUS TRACKER LIFESTYLE STRATEGY FACTSHEET

What is a Lifestyle Strategy?

As you approach your retirement date, you'll probably want to reduce your investment risk. This Lifestyle Strategy is designed to help you do that. Your investments are gradually switched from higher to lower risk portfolios as you get closer to retirement.

The Lifestyle Strategy is not compulsory. You can start or stop it at any time, but it must apply to all contributions to your plan.

What governance process is in place?

Your Lifestyle Strategy comes with ongoing governance. This simply means that our investment experts check it regularly. It allows us to maintain the best mix of assets in line with the risk category - and to make sure it is performing in line with its overall objectives - aiming to give you the best returns. The value of your investment can go down as well as up and you may not get back the value of the original investment.

If our experts decide that the mix of assets needs to be adjusted, it happens automatically on your behalf, you don't need to do anything. What's more, this service comes at no extra cost.

For full details of our governance process please visit our website at royallondon.com/pensioninvestments.

Who is this strategy designed for?

It has been designed for investors with a cautious attitude to risk. If you're not sure what your risk attitude is you can complete our online Risk Attitude Profiling Questionnaire at royallondon.com/pensioninvestments to give you an idea of your attitude to risk.

If you are in any doubt about the suitability of any particular type of investment, you should seek professional financial advice. Advisers may charge for providing such advice and should confirm any costs beforehand.

What is the investment objective?

This strategy aims to deliver above inflation growth in the value of the fund at retirement, whilst taking a level of risk consistent with a cautious risk attitude.

Where is the strategy invested?

The strategy is invested in the Governed Portfolios shown. The mix of assets in each Governed Portfolio may change at any time in the future if our investment experts decide that a different blend of assets is more appropriate. It's an automatic process and there's no charge for it.

You will be automatically invested into the strategy at the point that matches your time to retirement.

As you approach retirement your money is automatically switched to ensure a gradual move between the portfolios and fund splits shown below. The switching occurs on a monthly basis.

Fund splits as at 25th June 2026 are shown in the following table:

| Cautious Tracker Lifestyle Strategy | |
|--|--------|
| Investment information 15 Years or more from retirement: | |
| Governed Portfolio Enhanced | |

Details of changes to the strategy

The following table documents the last 3 changes that Royal London have made to the portfolios within this strategy.

| Effective Date of Change | Overview of Changes |
|--------------------------|--|
| 25/06/2026 | Governed Portfolio Enhanced Global markets have traded stronger over recent weeks as geopolitical tensions have eased on progress towards a US-Iran peace deal. In effect, this is a new ceasefire deal but with the agreement of the Strait of Hormuz reopening. Oil flows have picked up since the announcement, but traffic remains well below pre-war levels. We are moving neutral on commodities, taking profits at these levels given the increase in supply. Elsewhere, we are adding to equities at the margin given growth demand remains resilient and remain underweight bonds as market uncertainty continues to drive yields higher. |
| 25/06/2026 | Governed Portfolio Moderate Global markets have traded stronger over recent weeks as geopolitical tensions have eased on progress towards a US-Iran peace deal. In effect, this is a new ceasefire deal but with the agreement of the Strait of Hormuz reopening. Oil flows have picked up since the announcement, but traffic remains well below pre-war levels. We are moving neutral on commodities, taking profits at these levels given the increase in supply. Elsewhere, we are adding to equities at the margin given growth demand remains resilient and remain underweight bonds as market uncertainty continues to drive yields higher. |

| 25/06/2026 | Governed Portfolio Defensive Global markets have traded stronger over recent weeks as geopolitical tensions have eased on progress towards a US-Iran peace deal. In effect, this is a new ceasefire deal but with the agreement of the Strait of Hormuz reopening. Oil flows have picked up since the announcement, but traffic remains well below pre-war levels. We are moving neutral on commodities, taking profits at these levels given the increase in supply. Elsewhere, we are adding to equities at the margin given growth demand remains resilient and remain underweight bonds as market uncertainty continues to drive yields higher. |
| 11/06/2026 | Governed Portfolio Enhanced After their recent rally since the March lows, global equities came under pressure last week amid a sell-off in semiconductors as Broadcom's disappointing outlook for AI chip demand was coupled with fears of Fed rate hikes, and a relapse in the Iran War situation. We are reducing our overweight in commodities, taking profits at these levels. Elsewhere, we continue to remain marginally overweight equities, given growth demand remains resilient as well as underweight bonds, as uncertainty surrounding the Iran War continues to drive yields higher. |

| Effective Date of Change | Overview of Changes |
|--------------------------|--|
| 14/05/2026 | <p>Governed Portfolio Enhanced Global equities have continued to advance, as strong company earnings and optimism around AI have driven indices to new all-time highs. However, uncertainty surrounding the Iran war remains and macro indicators are deteriorating. We are reducing our equity exposure, taking profits following the recent rally. We are also adding to commodities given increasing expectations of a more prolonged disruption in the Middle East. Elsewhere, we are moving further underweight bonds. Yields continue to rise globally, especially at the longer end in the UK in the aftermath of the recent local elections.</p> |
