GOVERNED RANGE
GOVERNED RETIREMENT INCOME PORTFOLIO 1 FACTSHEET

Risk Grading : Risk Rating 1

What is a Governed Retirement Income Portfolio?

Choosing a suitable portfolio of funds to meet your requirements can be difficult. Our range of Governed Retirement Income Portfolios is designed to help with exactly that.

A Governed Retirement Income Portfolio matches your risk attitude to a suitable mix of assets and funds. There are five portfolios to choose from so you can select the one that best suits your risk attitude.

What governance process is in place?

Your portfolio comes with ongoing governance. This simply means that our investment experts check it regularly. It allows us to maintain the best mix of assets in line with the risk category - and to make sure it is performing in line with its overall objectives - aiming to give you the best returns. The value of your investment can go down as well as up and you may not get back the value of the original investment.

If our experts decide that the mix of assets needs to be adjusted, it happens automatically on your behalf, you don't need to do anything. What's more, this service comes at no extra cost.

For full details of our governance process please visit our website at **royallondon.com/pensioninvestments**.

Who is this portfolio designed for?

It is designed for someone who is taking income from their plan and can accept a level of uncertainty in their future income consistent with a risk rating 1 attitude to risk.

If you are in any doubt about the suitability of any particular type of investment, you should seek professional financial advice.

Advisers may charge for providing such advice and should confirm any costs beforehand.

What is the investment objective?

This portfolio aims to deliver growth above inflation to support regular income withdrawals, whilst taking a level of risk consistent with a risk rating 1 risk attitude.

Where is the portfolio invested?

The fund mix of the portfolio as at 11th May 2023 is shown below:

Governed Retirement Income Portfolio 1

The Global Managed fund invests in UK, Global and Emerging Market equities. The current benchmark split is 35% UK Equities, 55% Global Equities and 10% Emerging Markets Equities. You can replace the Global Managed pension fund with an alternative equity fund or funds from the Royal London Pensions fund range.

If you want to know more about any of the funds within your portfolio, including details of fund charges, please visit our website **royallondon.com/pensioninvestments** and view the relevant fund factsheet.

Does the portfolio rebalance?

This portfolio rebalances monthly. If a portfolio is not rebalanced regularly, the asset mix can drift significantly over time changing the suitability of the portfolio.

What is the portfolio benchmark?

The benchmark is a target against which performance is measured.

This benchmark is regularly reviewed and may be updated by Royal London so that it remains appropriate for the investor profile as detailed in the section **"Who is this portfolio designed for?"** or where a component index is discontinued or replaced.

The benchmark for this portfolio is a composite of indices:

FTSE World Index (6.87%)/FTSE All Share Index (4.38%)	11.25%
MSCI Emerging Markets ESG Index	1.25%
ABI UK - UK Direct Property	5.00%

JPMorgan Global GBI Hedged Index	4.00%
FTSE Actuaries UK Conventional Gilts up to 5 Years Index	11.00%
Sterling Overnight Index Average (SONIA)	10.00%

Details of changes to the portfolio

The following table documents the last 3 changes that Royal London have made to this portfolio.

Effective Date of Change	Overview of Changes
11/05/2023	**Governed Retirement Income Portfolio 1** We have been overweight equities, noting the improvement in macro conditions which has helped stock markets to record a positive start to the year. We maintain this overweight position in stocks but have deepened our commodity underweight position given signs of peaking inflation and waning energy demand.
20/04/2023	**Governed Retirement Income Portfolio 1** We are overweight equities against the new strategic asset allocation. Global growth continues to show tentative signs of stabilisation and we see continued upside risk in equity markets as banking sector turmoil has subsided for now. However, we are ready to become more defensive if we start to see evidence of tighter financial conditions impacting the economy or if inflation remains elevated and forces further central banks tightening. We remain underweight commodities and have reduced our underweight in property.
23/03/2023	**Governed Retirement Income Portfolio 1** We have been overweight equities but have reduced risk in the portfolios as uncertainty rises around the banking sector, reducing exposure to equities and deepening our commodity underweight position given rising recession risks. We are monitoring the situation closely, ready either to get more defensive or buy the dip as the economic impact of recent events becomes clearer. We have increased our overall exposure to bonds, adding to credit and government bonds.
