

GOVERNED RANGE GOVERNED RETIREMENT INCOME PORTFOLIO 2 FACTSHEET

Risk Grading : Risk Rating 2

What is a Governed Retirement Income Portfolio?

Choosing a suitable portfolio of funds to meet your requirements can be difficult. Our range of Governed Retirement Income Portfolios is designed to help with exactly that.

A Governed Retirement Income Portfolio matches your risk attitude to a suitable mix of assets and funds. There are five portfolios to choose from so you can select the one that best suits your risk attitude.

What governance process is in place?

Your portfolio comes with ongoing governance. This simply means that our investment experts check it regularly. It allows us to maintain the best mix of assets in line with the risk category - and to make sure it is performing in line with its overall objectives - aiming to give you the best returns. The value of your investment can go down as well as up and you may not get back the value of the original investment.

If our experts decide that the mix of assets needs to be adjusted, it happens automatically on your behalf, you don't need to do anything. What's more, this service comes at no extra cost.

Who is this portfolio designed for?

It is designed for someone who is taking income from their plan and can accept a level of uncertainty in their future income consistent with a risk rating 2 attitude to risk.

If you are in any doubt about the suitability of any particular type of investment, you should seek professional financial advice.

Advisers may charge for providing such advice and should confirm any costs beforehand.

What is the investment objective?

This portfolio aims to deliver growth above inflation to support regular income withdrawals, whilst taking a level of risk consistent with a risk rating 2 risk attitude.

Does the portfolio rebalance?

This portfolio rebalances monthly. If a portfolio is not rebalanced regularly, the asset mix can drift significantly over time changing the suitability of the portfolio.

What is the portfolio benchmark?

The benchmark is a target against which performance is measured.

This benchmark is regularly reviewed and may be updated by Royal London so that it remains appropriate for the investor profile as detailed in the section "**Who is this portfolio designed for?**" or where a component index is discontinued or replaced.

The benchmark for this portfolio is a composite of indices:

Details of changes to the portfolio

The following table documents the last 3 changes that Royal London have made to this portfolio.

Effective Date of Change	Overview of Changes
16/08/2018	<p>Governed Retirement Income Portfolio 2</p> <p>A currency crisis in Turkey has rattled global stock markets. Before the selloff, our multi asset funds were already positioned relatively defensively, with the smallest overweight in equities since 2012 and favouring the US over emerging markets. We continued to reduce exposures to stocks and commodities, bringing the latter allocation into line with the benchmark, and lowered holdings of cash. The proceeds were moved into government bonds and short duration high yield debt. We will look to repurchase stocks in coming months. We are modestly overweight global equities and short dated global high yield bonds.</p>

Effective Date of Change	Overview of Changes
12/07/2018	<p>Governed Retirement Income Portfolio 2</p> <p>Our Investment Clock may enter its 'Stagflation' phase during summer, as inflation tracks slightly higher while global growth cools, especially outside the US. Stocks are flat year-to-date after a burst of volatility that marked a global growth peak; a deteriorating economic backdrop and talk of trade wars signal further volatility. We continued to take profits on our equities position, where the overweight is the lowest since 2012, and reduced our overweight commodities allocation; the proceeds were moved into government bonds and cash, reducing underweights. We are modestly overweight global equities, global high yield bonds and commodities.</p>

Effective Date of Change	Overview of Changes
07/06/2018	<p>Governed Retirement Income Portfolio 2</p> <p>Our Investment Clock remains in its 'Overheat' phase, with greater risk of inflation, although there are indications of economic weakness outside the US. We expect stocks to trade in a range over summer; investor sentiment, having been very fearful in February, is now neutral. After capitalising on weak markets in the first quarter to increase equity exposures, we have been taking profits on our overweight position as prices recovered, moving the proceeds into cash. Longer term, we remain positive on stocks but more cautious on government bonds. We are moderately overweight global equities, global high yield bonds and commodities.</p>
