

GOVERNED RANGE GRIP 2 (ISA) FACTSHEET

What is a Governed Retirement Income Portfolio?

Choosing a suitable portfolio of funds to meet your requirements can be difficult. Our range of Governed Retirement Income Portfolios is designed to help with exactly that.

A Governed Retirement Income Portfolio matches your risk attitude to a suitable mix of assets and funds. There are five portfolios to choose from so you can select the one that best suits your risk attitude.

What governance process is in place?

Your portfolio comes with ongoing governance. This simply means that our investment experts check it regularly. It allows us to maintain the best mix of assets in line with the risk category - and to make sure it is performing in line with its overall objectives - aiming to give you the best returns. The value of your investment can go down as well as up and you may not get back the value of the original investment.

If our experts decide that the mix of assets needs to be adjusted, it happens automatically on your behalf, you don't need to do anything. What's more, this service comes at no extra cost.

For full details of our governance process please visit our website at royallondon.com/pensioninvestments.

Who is this portfolio designed for?

It is designed for someone who is taking income from their plan and can accept a level of uncertainty in their future income consistent with attitude to risk.

If you are in any doubt about the suitability of any particular type of investment, you should seek professional financial advice.

Advisers may charge for providing such advice and should confirm any costs beforehand.

What is the investment objective?

This portfolio aims to deliver growth above inflation to support regular income withdrawals, whilst taking a level of risk consistent with risk attitude.

Where is the portfolio invested?

The fund mix of the portfolio as at 25th June 2026 is shown below:

Does the portfolio rebalance?

This portfolio rebalances monthly. If a portfolio is not rebalanced regularly, the asset mix can drift significantly over time changing the suitability of the portfolio.

What is the portfolio benchmark?

The benchmark is a target against which performance is measured.

This benchmark is regularly reviewed and may be updated by Royal London so that it remains appropriate for the investor profile as detailed in the section **"Who is this portfolio designed for?"** or where a component index is discontinued or replaced.

The benchmark for this portfolio is a composite of indices:

BofA Merrill Lynch Global HY Constrained GBP Hedged Index	4.50%
Markit iBoxx Sterling Non-Gilt Index (13.00%)/Bloomberg Global Aggregate Corporate GBP Hedged Index (3.50%)/ICE BofA Merrill Lynch 1-5 Year Sterling Non-Gilt Index (1.50%)	18.00%

ABI UK - UK Direct Property	6.25%
Bloomberg Commodity Index	5.00%

Details of changes to the portfolio

The following table documents the last 3 changes that Royal London have made to this portfolio.

Effective Date of Change	Overview of Changes
25/06/2026	<p>GRIP 2 (ISA)</p> <p>Global markets have traded stronger over recent weeks as geopolitical tensions have eased on progress towards a US-Iran peace deal. In effect, this is a new ceasefire deal but with the agreement of the Strait of Hormuz reopening. Oil flows have picked up since the announcement, but traffic remains well below pre-war levels. We are moving neutral on commodities, taking profits at these levels given the increase in supply. Elsewhere, we are adding to equities at the margin given growth demand remains resilient and remain underweight bonds as market uncertainty continues to drive yields higher.</p>

Effective Date of Change	Overview of Changes
11/06/2026	<p>GRIP 2 (ISA)</p> <p>After their recent rally since the March lows, global equities came under pressure last week amid a sell-off in semiconductors as Broadcom's disappointing outlook for AI chip demand was coupled with fears of Fed rate hikes, and a relapse in the Iran War situation. We are reducing our overweight in commodities, taking profits at these levels. Elsewhere, we continue to remain marginally overweight equities, given growth demand remains resilient as well as underweight bonds, as uncertainty surrounding the Iran War continues to drive yields higher.</p>
14/05/2026	<p>GRIP 2 (ISA)</p> <p>Global equities have continued to advance, as strong company earnings and optimism around AI have driven indices to new all-time highs. However, uncertainty surrounding the Iran war remains and macro indicators are deteriorating. We are reducing our equity exposure, taking profits following the recent rally. We are also adding to commodities given increasing expectations of a more prolonged disruption in the Middle East. Elsewhere, we are moving further underweight bonds. Yields continue to rise globally, especially at the longer end in the UK in the aftermath of the recent local elections.</p>
